

Topics in Business Information Technology

26FS

Programme	BSc in Wirtschaftsinformatik														
Degree	Bachelor														
ECTS	5														
Module type	mandatory module														
Module coordinator	Jacqueline Vitacco														
Leading principle / Short description	Business information specialists are faced with new technologies and trends throughout their working lives. They must be able to acquaint themselves with new information quickly and independently, in order to evaluate these technologies and trends for business use. Many businesses operate globally, and important meetings are held in English. The goal of Tobit is to reproduce this situation for students.														
Module content	In Tobit, each student chooses a topic to investigate in depth. The student then summarizes the findings in a report, presentation (20 min) and discussion (10 min). The goal is knowledge transfer: distill the results of detailed research into the most important information, such as might be required by management, and to present this information understandably. (3.1,3.2) Tobit is conducted as a seminar, and attendance is required at the presentations of at least two other students. Tobit is an important part of the preparations for the bachelor thesis.														
Competencies to be achieved	Knowledge and Understanding: Students ... - learn to understand new ideas. Each student receives a topic to prepare, and each topic is supervised by an instructor. Applying Knowledge and Understanding: Students ... - One of the most important view of the final document should be, how the new ideas, could be helpful to solve business problems. (2.1) Making Judgements: Students ... - The type of analysis required depends on the subject: assess the advantages and disadvantages of a technology, or the pros and cons of some new development Communications Skills: Students ... - learn to discuss their prepared topic with students in the same topic group critically. These seminar situation should be an opportunity to learn more about the topic in different views. Learning Skills: Students ... - have knowledge to find important information about a new Topic. Particular attention should be paid to using good references. The goal is to find and use authoritative source documents. (4.1)														
Prerequisites	None														
Teaching and learning methods	Contact Hours: Interactive instruction, Seminar, Discussion, Presentation Guided Self-Study: Individual work														
Literature	Required Reading: depends on assigned topic														
Remarks	Links to other modules: Academic Writing														
Grading	Grade 1-6 (half grades)														
Assessment	ToBIT paper 80% <table> <tr> <td>Oral / Written</td><td>Written</td></tr> <tr> <td>Grading Scale</td><td>Points</td></tr> <tr> <td>Remarks</td><td>Further requirement: submission of research proposal</td></tr> </table> ToBIT presentation 20% <table> <tr> <td>Oral / Written</td><td>oral</td></tr> <tr> <td>Duration (min)</td><td>20</td></tr> <tr> <td>Grading Scale</td><td>Points</td></tr> <tr> <td>Remarks</td><td>Further requirement: participation in two further student presentations</td></tr> </table>	Oral / Written	Written	Grading Scale	Points	Remarks	Further requirement: submission of research proposal	Oral / Written	oral	Duration (min)	20	Grading Scale	Points	Remarks	Further requirement: participation in two further student presentations
Oral / Written	Written														
Grading Scale	Points														
Remarks	Further requirement: submission of research proposal														
Oral / Written	oral														
Duration (min)	20														
Grading Scale	Points														
Remarks	Further requirement: participation in two further student presentations														

Module details**Topics in Business Information Technology (WIVZ 2.51) - Wed - Olten**

Time	1:15 PM - 5:00 PM
Language	Deutsch
Periodicity	Weekly
Lecturers	Jacqueline Vitacco, Stefan Buttlinger
Number	3-26FS.W-B-WIVZ-040503S1.SN/VZ24
