

Wahlmodule 2025/26

Electives 2025/26

BSc in Wirtschaftsinformatik
BSc in Business Information Technology

30. April 2025

Regulations Electives (1/2)

Free Credits

- *Elective modules belong to the free credit area. As a rule, an elective module results in 3 credits.*
- *At least 15 free credits onwards are required for the successful completion of the Bachelor programme. These can be taken from the 3rd semester onwards within the framework of elective modules as well as context or focus modules (from the BOEK or IM degree programmes).*
- *No core/compulsory module can be replaced by an elective module.*

Additional electives from the specialisations

- *Modules from the specialisations can be taken as electives if there are still enough places available.*
- *The prerequisite for taking these modules is **110 ECTS**.*

Focus and context modules

- *The number of participants in the context and focus modules of the BOEK and IM programmes is limited. Before registering, please inquire when the respective module will take place and whether you are able to participate.*

Regulations Electives (2/2)

Commitment

- *Registrations only in case of real interest!*

Implementation

- *25 registrations are required for an elective module to take place. No implementation guarantee of electives after they have been published on ESP.*
- *If there are too many registrations, priority will be given to students in the higher semesters.*
- *Students will be informed by the end of May 2024 whether an elective takes place in the autumn semester or not.*
- *If an elective module does not take place, another elective can be chosen.*
- *Elective modules take place during quarterlies or during a block week.*
